PROFESSIONAL SUMMARY

Total Experience: 9 Years | Relevant Experience: 8 years 3 Months

Senior QA Automation Engineer with 9 years of experience in automation testing across Banking, E-commerce, and Retail domains. Strong experience in developing and maintaining automation frameworks using Java, Selenium, Cucumber, Rest Assured, and Playwright, with expertise in UI and API automation, CI/CD, and regression testing. Experienced in leveraging GitHub Copilot and GenAI-assisted development for framework enhancements, debugging, and test script development. Proven ability to collaborate with cross-functional teams, improve automation efficiency, and support reliable software releases.

PROFESSIONAL EXPERIENCE

Sep 2024 — Present

Senior Test Engineer | CGI Inc., Chennai, IN

Project: Deutsche Bank – Investment Banking

- Built and maintained a scalable automation framework using Java, Selenium, and Cucumber (BDD) to support complex investment banking workflows.
- Configured and optimized TeamCity CI/CD pipelines for automated testing, accelerating feedback cycles for development teams.
- Executed regression suites with Selenium and JUnit, ensuring release stability and minimizing risk during frequent deployments.
- Used GitHub Copilot to troubleshoot framework issues, improve existing automation code, and speed up implementation of framework enhancements.
- Developed reusable utilities across multiple releases, improving team efficiency and reducing duplicate effort.
- Managed defects and prepared daily/weekly reports in JIRA, ensuring clear stakeholder communication.
- Collaborated with cross-functional teams to design performance test scenarios and validate system reliability.

Nov 2021 — Sep 2024

IT Analyst | Tata Consultancy Services (TCS), Bengaluru, IN

Project: Apple – AOS (Apple Online Store)

- Improved automation frameworks combining Java, Selenium, RestAssured, and Cucumber for comprehensive UI and API validation.
- Implemented custom listeners for JUnit / TestNG / Cucumber to feed real-time execution data into Postgres dashboards.
- Performed REST API testing (GET, POST, PUT, DELETE), validating authentication flows and CURL-driven requests.
- Supported end-to-end SIT and UAT regression cycles, ensuring smooth delivery of business-critical features.
- Tracked and managed defects using Apple's Radar tool, collaborating actively with developers for timely resolution.
- Awarded for Best Technical Performance in the team.

Jan 2019 — Nov 2021

Senior Software Engineer | Maveric Systems Ltd., Chennai, IN

Project: Standard Chartered Bank – ICCD (Feb 2019 – Jun 2019)

- Executed regression testing using Quantum Framework with Cucumber, Java, Selenium, and TestNG.
- Developed common utilities for the Quantum framework and reported issues to stakeholders.

Project: Citi Bank – Payments & Mobile Banking (Jun 2019 – Nov 2021)

- Developed regression test suites for mobile banking using Quantum Framework, Cucumber, Java, and Selenium.
- Executed API testing with Rest Assured to validate responses and ensure database consistency for payment services.
- Conducted SIT and UAT for critical banking application releases, ensuring quality and regulatory compliance.
- Identified and resolved defects using ALM; upgraded testing efficiency with improved Quantum framework utilities.
- Awarded for creating a Data Validation Utility Tool that streamlined testing workflows across the Citi project.

May 2018 — Jan 2019

Software Tester | RCK Techiees Inc., Chennai, IN

Project: AUTOBUY – E-commerce & Payroll

- Automated test scenarios using BDD Cucumber Framework with Selenium and Java, improving application stability by 25%.
- Designed and maintained regression suites, analyzing requirements and raising defects in ALM.

- Participated in daily Scrum meetings to report progress and blockers, maintaining team transparency.

Jul 2017 — Mar 2018

Researcher (BPO) | The Deal India Pvt Ltd (Formally Known as BoardEx India Pvt Ltd)., Chennai, IN

EDUCATION

Jan 2013 — Jan 2017

Jaya College of Engineering and Technology, Chennai, TN | Bachelor of Engineering – Computer Science (CSE)

SKILLS & TECHNICAL COMPETENCIES

Programming Languages: Java (Primary), Python (Basics), Groovy, Scala (Basics), Java, JavaScript / TypeScript

Testing & Quality Assurance: Selenium WebDriver, Appium, Playwright, Cypress, Rest Assured, TestNG, JUnit, Cucumber (BDD), Serenity, Quantum, QAF-BDD, Functional, Regression, Smoke, Sanity, SIT, UAT, API, Mobile, Cross-Browser, Performance (JMeter), Integration testing, End-to-end testing, RestAssured, REST, SOAP, JSON, XML, Maven, Gradle, Karate

DevOps & CI/CD: Jenkins, TeamCity, Git, GitHub, Bitbucket, CI/CD pipelines, Monitoring & logging

Databases: PostgreSQL, MongoDB, Oracle SQL Developer

IT Support Tools: JIRA, HP ALM, Apple Radar

Frameworks: Behavior Driven Development, Data Driven Framework, Hybrid Framework, Keyword Driven Framework

Data & Analytics: Allure, Extent Reports, Tableau, Excel / Google Sheets, SQL (analytical)

AI & Machine Learning: GitHub Copilot, GenAI for Test Script Development & Debugging, Prompt Engineering for Test Automation, Prompt engineering

Skill application highlights:

TECHNICAL SKILLS

Programming Languages: Developed robust test automation frameworks in Java across 50+ test scenarios using Selenium and Playwright

Test Automation Frameworks & Tools: Implemented end-to-end automation using Selenium WebDriver, Appium, and Playwright across web and mobile platforms, covering functional, regression, and cross-browser testing for enterprise applications.

API & Service Testing: Designed and executed comprehensive REST and SOAP API test suites using Rest Assured and Karate, validating data integrity and integration points across microservices architecture.

BDD & Test Reporting: Established Cucumber-based BDD test frameworks with Serenity reporting, enabling stakeholder-aligned test documentation and generating Allure reports that improved test visibility across QA teams.

Performance & Quality Assurance: Conducted performance testing using JMeter and executed SIT/UAT cycles, identifying bottlenecks and ensuring application quality across multiple testing phases.

DevOps & CI/CD Integration: Built and maintained Jenkins and TeamCity CI/CD pipelines integrated with Git repositories, automating test execution and enabling continuous quality feedback within agile delivery cycles.

Database & Data Management: Wrote SQL queries in PostgreSQL and Oracle for test data validation and analytical reporting, leveraging Excel for test metrics aggregation and trend analysis.

AI-Assisted Automation: Leveraged GitHub Copilot and GenAI tools for test script generation and debugging, applying prompt engineering to accelerate automation development and reduce script maintenance overhead.

Test Management & Collaboration: Managed test execution workflows and defect tracking using JIRA and HP ALM, streamlining QA communication across distributed teams.
